

Toward Modern Models of Introductory Computing
Courses – CS1 and CS2 Course Exemplars infused with
Parallel and Distributed Computing Concepts¹

¹NSF Award #2321015

Contents

0	An Overview and Roadmap	18
0.1	Introduction (Vaidy, Sushil)	21
0.2	Project Overview (Vaidy, Sushil)	21
0.3	Project Focus and Team Structures (Vaidy, Alan)	22
0.4	Methodology Employed	24
0.4.1	PDC Topics Chosen: Data Parallelism, Distributed Data Access, and Event Driven Processing	24
0.4.2	Testing team recruitment	25
0.4.3	Collaboration among Development and Testing teams, and support of Backbone team	26
0.4.4	Exemplar Creation and Testing by the Development Teams	26
0.4.5	Adaptation and Adoption by Testing Teams	27
0.4.6	Evaluation Methods	28
0.5	Faculty Learning Community Formation (Chip, Neena)	28
0.6	Roadmap for Subsequent Chapters (Sushil)	28
0.6.1	Start from Your Adoption Goal	28
0.6.2	CS1 Exemplars at a Glance	29
0.6.3	Using Chapter 1 with Institutional Chapters	30
0.6.4	Finding Materials Quickly	31
0.6.5	Summary Guidance	31
0.7	Appendix - Prior Work Framing this Project (Sushil, Vaidy)	32
PART I	- Computer Science 1 (CS1)	35
1	Common CS1 Activities and Lessons	36
1.1	Introduction (Alan, Sushil)	38
1.2	How CS1 was changed and PDC topics integrated (April)	40
1.2.1	Challenges (April)	41
1.3	New Unplugged Activities	42
1.3.1	Flag Maker (David, April)	42
1.3.2	Unplugged Penny Search Activity (Srishti)	46
1.3.3	Using Animations (Sue)	52
1.4	New Plugged-in Activities	58
1.4.1	Programming Flag Maker	58
1.4.2	Greenfoot	61

1.4.3	Image Processing	61
1.4.4	Earthquake Tracker Programming Assignment (April)	62
1.5	Course-wide Pre and Post Course Surveys (Chris)	63
1.6	Other Activities and Ideas	64
1.7	Conclusion	64
	Bibliography	66
	Appendix	67
1.1	Vaidy Testing Section To Be Removed Later	67
2	CS1 course package - TNTECH	68
2.1	Introduction	72
2.2	How CS1 was changed and PDC topics integrated	74
2.2.1	Integrated Syllabi (Pre and Post)	75
2.2.2	PDC Topics Integrated	76
2.2.3	Highlights	78
2.2.4	Challenges	78
2.3	New Unplugged Activities	79
2.3.1	Unplugged Penny Search Activity	79
2.3.2	Unplugged Flag Maker Activity	83
2.4	New Plugged-in Activities	85
2.4.1	Plugged-In Earthquake Tracker Assignment	85
2.4.2	Plugged-In OpenMP Data Parallelism Assignment	89
2.5	Course-wide Pre and Post Course Surveys	96
2.5.1	Results of Pre-Course and Post-Course Surveys	96
2.6	Conclusion	98
	Bibliography	102
	Appendix	103
3	CS1 course package - Knox	107
3.1	Introduction	110
3.2	How CS1 was changed and PDC topics integrated	110
3.2.1	Syllabus	110
3.2.2	Highlights	110
3.2.3	Challenges	110
3.3	New Unplugged Activities	110
3.3.1	Identifying mystery functions	110
3.4	New Plugged-in Activities	111
3.4.1	Programming Flagmaker	111
3.4.2	Knoxcraft	111
3.5	Course-wide Pre and Post Course Surveys	111
3.6	Other Activities and Ideas	111
3.7	Conclusion	112
	Bibliography	113
	Appendix	114

4	CS1 course package - USI	115
4.1	Introduction	121
4.2	How CS1 was changed and PDC topics integrated	121
4.2.1	Integrated Syllabi (Pre and Post)	122
4.2.2	Highlights	123
4.2.3	Challenges	124
4.3	New Unplugged Activities	125
4.3.1	Unplugged Flag Maker Activity	125
4.3.2	Unplugged Penny Sorting Exercise	130
4.4	New Plugged-in Activities	133
4.4.1	Flag Maker Plugged-In Activity	133
4.4.2	Parallel Penny Sort Plugged-In Activity	136
4.4.3	Greenfoot Plugged-In Demo (time permitting/optional for CS1)	139
4.5	Course-wide Pre and Post Course Surveys	141
4.5.1	Results and Analysis: Fall 2024 Benchmark Survey Data	142
4.5.2	Results and Analysis: Fall 2025 PDC Intervention Survey Data	144
4.5.3	Did the PDC Intervention Improve Learning?	147
4.6	Other Activities and Ideas	147
4.6.1	More Processors are Not Always the Best	147
4.7	Conclusion	151
4.7.1	Future Work	152
	Bibliography	153
	Appendix	154
5	CS1 course package - UNL	157
5.1	Introduction	159
5.2	How CS1 was changed and PDC topics integrated	159
5.2.1	Integrated Syllabi (Pre and Post)	160
5.2.2	Challenges	160
5.2.3	Student Time Commitment	160
5.3	New Unplugged Activities	161
5.4	New Plugged-in Activities	161
5.4.1	Codeless PDC Modules	161
5.4.2	Structure	161
5.5	Course-wide Pre and Post Course Surveys	165
5.6	Other Activities and Ideas	165
5.6.1	Lab: Processing a Remote Data Source	166
5.6.2	Programming: Vibe Coding a Client-Server Battleship Game	166
5.7	Conclusion	166
	Bibliography	169
	Appendix	170
6	CS1 course package - Webster	171
6.1	Introduction	173
6.2	How CS1 was changed and PDC topics integrated	173

6.2.1	Integrated Syllabi (Pre and Post)	174
6.2.2	Highlights	174
6.2.3	Challenges	177
6.3	New Unplugged Activities	177
6.3.1	Animations and Visualizations	177
6.4	New Plugged-in Activities	178
6.4.1	Zombie Attack Assignment	178
6.5	Course-wide Pre and Post Course Surveys	180
6.6	Other Activities and Ideas	180
6.7	Conclusion	182
	Bibliography	183
	Appendix	184
7	CS1 course package - Casper	191
7.1	Introduction	195
7.2	How CS1 was changed and PDC topics integrated	195
7.2.1	Integrated Syllabi (Pre and Post)	196
7.2.2	Highlights	197
7.2.3	Challenges	197
7.3	New Unplugged Activities	197
7.3.1	zyBooks Section 1.9 Parallel Computing	197
7.3.2	Unplugged Penny Search Activity	198
7.3.3	Unplugged Coin Addition Activity	201
7.4	New Plugged-In Activities	203
7.4.1	Plugged-In OpenMP Array Creation Assignment	203
7.4.2	Plugged-In OpenMP Array Sum Assignment	205
7.4.3	Plugged-In Distributed Data USGS API Earthquake Assignment	208
7.4.4	Plugged-In Physical Computing 1 Introduction and Traffic Light	210
7.4.5	Plugged-In Physical Computing 2 Buttons and Multiple Processes	212
7.4.6	Plugged-In Physical Computing 3 Temperature Sensor	214
7.5	Course-wide Pre and Post Course Surveys	215
7.6	Conclusion	220
	Bibliography	221
	Appendix	222
8	CS1 course package - HPU	223
8.1	Introduction	227
8.2	How CS1 was changed and PDC topics integrated	227
8.2.1	Integrated Syllabi (Pre and Post)	227
8.2.2	Highlights	229
8.2.3	Challenges	229
8.2.4	Unplugged Activities	230
8.3	New Unplugged Activities	231
8.3.1	Unplugged - Flag Maker Activity	231
8.3.2	Unplugged - Penny Sorting	236

8.4	New Plugged-in Activities	242
8.4.1	Plugged-in - Parallel Sort Activity	242
8.5	Course-wide Pre and Post Course Surveys	247
8.6	Other Activities and Ideas	251
8.6.1	Unplugged Activity-More Processors (MP) Writing Activity	251
8.6.2	Ideas on Activities	254
8.7	Conclusion	255
	Bibliography	257
	Appendix	258
9	CS1 course package - MSU	260
9.1	Introduction	264
9.2	How CS1 was changed and PDC topics integrated	264
9.2.1	Integrated Syllabi (Pre and Post)	264
9.2.2	Highlights	265
9.2.3	Challenges	266
9.3	New Unplugged Activities	267
9.3.1	Flag Maker	267
9.4	New Plugged-in Activities	270
9.5	Course-wide Pre and Post Course Surveys	270
9.6	Other Activities and Ideas	274
9.7	Conclusion	274
	Bibliography	276
	Appendix	277
	PART II - Computer Science 2 (CS2)	280
10	CS2 course package - CDER	281
10.1	Introduction	283
10.2	How CS1 was changed and PDC topics integrated	283
10.2.1	Integrated Syllabi (Pre and Post)	283
10.2.2	Highlights	283
10.2.3	Challenges	283
10.3	New Unplugged Activities	283
10.3.1	Overly Complicated Machine (Srishti will write this.)	283
10.4	New Plugged-in Activities	283
10.4.1	Fork Join Activity (David will write this.)	283
10.4.2	Parallel vs. Serial Sort Algorithm Comparison (April will write this.)	284
10.4.3	Parallel Image Processing	284
	Bibliography	291
	Appendix	292
10.4	Github Link to Instructional Material	292
10.5	Detailed Pre and Post Syllabus	292
10.6	Organization of Material	292
10.7	Survey and Other Anonymized Data and Analysis	292

11 CS2 course package - TNTECH	295
11.1 Introduction	298
11.2 How CS2 was changed and PDC topics integrated	298
11.2.1 PDC Topics Integrated	299
11.2.2 Integrated Syllabi (Pre and Post)	299
11.2.3 Highlights	299
11.2.4 Challenges	299
11.3 New Plugged-in Activity	300
11.3.1 Sort Algorithm Time Comparison Programming Assignment	300
11.4 Course-wide Pre and Post Course Surveys	303
11.4.1 Results of Pre-Course and Post-Course Surveys	305
11.5 Conclusion	306
Bibliography	308
Appendix	309
12 CS2 course package - Knox	310
12.1 Introduction	313
12.2 How CS2 was changed and PDC topics integrated	313
12.2.1 Syllabus	313
12.2.2 Summary of changes	313
12.2.3 Challenges	313
12.3 Introducing the Fork-join framework	314
12.3.1 Problem Description, Prerequisites, and Learning Outcomes	314
12.3.2 Implementation Details	314
12.3.3 Experience and Teaching Tips	314
12.3.4 Data and Analysis	314
12.4 Course-wide Pre and Post Course Surveys	314
12.5 Other Activities and Ideas	314
12.6 Conclusion	314
Bibliography	315
Appendix	316
13 CS2 course package - USI	317
13.1 Introduction	319
13.2 How CS2 was changed and PDC topics integrated	319
13.2.1 Integrated Syllabi (Pre and Post)	319
13.2.2 Highlights	319
13.2.3 Challenges	319
13.3 New Unplugged Activities	319
13.3.1 The Overly Complicated Machine	319
13.3.2 Fork Join on Post-its	319
13.4 New Plugged-in Activities	320
13.4.1 Fork-Join Parallel Sum	320
13.4.2 Seeing Concurrency: A Java-Based Parallel Image Processing	320
13.5 Course-wide Pre and Post Course Surveys	321

13.5.1 Results and Analysis : Spring 2025 Survey Data	321
13.5.2 Results and Analysis : Spring 2026 Survey Data (PDC Intervention)	321
13.5.3 Did the PDC Intervention Improve Learning?	321
13.6 Other Activities and Ideas	321
13.7 Conclusion	321
Bibliography	322
Appendix	323
14 CS2 course package - UNL	324
14.1 Introduction	326
14.2 How CS1 was changed and PDC topics integrated	326
14.2.1 Integrated Syllabi (Pre and Post)	326
14.3 New Unplugged Activities	326
14.4 New Plugged-in Activities	326
14.4.1 Connection Pooling	326
14.4.2 Parallel Sort	327
14.5 Course-wide Pre and Post Course Surveys	327
14.6 Other Activities and Ideas	328
14.7 Conclusion	328
Bibliography	330
Appendix	331
15 CS2 course package - Webster	332
15.1 Introduction	334
15.2 How CS2 was changed and PDC topics integrated	334
15.2.1 Integrated Syllabi (Pre and Post)	334
15.2.2 Highlights	335
15.3 Introduction	340
15.4 How CS1 was changed and PDC topics integrated	340
15.4.1 Integrated Syllabi (Pre and Post)	340
15.4.2 Highlights	340
15.4.3 Challenges	340
15.5 New Unplugged Activities	340
15.5.1 Activity Name (e.g., Flag Maker)	340
15.6 New Plugged-in Activities	341
15.6.1 Activity Name (e.g., Parallel Search)	341
15.7 Course-wide Pre and Post Course Surveys	341
15.8 Other Activities and Ideas	341
15.9 Conclusion	341
Bibliography	343
Appendix	344
16 CS2 course package using Python - Webster	345
16.1 Introduction	348
16.2 How CS2 was changed and PDC topics integrated	348

16.2.1	Integrated Syllabi (Pre and Post)	348
16.2.2	Highlights	348
16.2.3	Challenges	350
16.3	New Unplugged Activities	351
16.4	New Plugged-in Activities	351
16.4.1	Zombie Attack	351
16.5	Course-wide Pre and Post Course Surveys	352
16.6	Other Activities and Ideas	352
16.7	Conclusion	353
	Bibliography	354
	Appendix	355
17	CS2 course package - Casper	358
17.1	Introduction	361
17.2	How CS2 was changed and PDC topics integrated	361
17.2.1	Integrated Syllabi (Pre and Post)	362
17.2.2	Highlights	362
17.2.3	Challenges	362
17.3	New Unplugged Activities	362
17.3.1	Unplugged Penny Search	362
17.3.2	Unplugged Coin addition	363
17.3.3	Fork-Join Clicker Questions	364
17.4	New Plugged-in Activities	366
17.4.1	Array Creation in parallel using OpenMP	366
17.4.2	Array summing in parallel using OpenMP	368
17.4.3	Greenfoot project	370
17.4.4	Parallel QuickSort	372
17.5	Course-wide Pre and Post Course Surveys	374
17.6	Other Activities and Ideas	374
17.7	Conclusion	375
17.8	Other Activities and Ideas	375
17.9	Conclusion	375
	Bibliography	380
	Appendix	381
18	CS2 course package - HPU	382
18.1	Introduction	386
18.2	How CS1 was changed and PDC topics integrated	386
18.2.1	Integrated Syllabi (Pre and Post)	386
18.2.2	Highlights	386
18.2.3	Challenges	386
18.3	New Unplugged Activities	386
18.3.1	Activity Name (e.g., Flag Maker)	386
18.4	New Plugged-in Activities	387
18.4.1	Activity Name (e.g., Parallel Search)	387

18.5 Course-wide Pre and Post Course Surveys	387
18.6 Other Activities and Ideas	387
18.7 Conclusion	387
Bibliography	388
Appendix	389
19 CS2 course package - MSU	390
19.1 Introduction	395
19.2 How CS2 was changed and PDC topics integrated	395
19.2.1 Integrated Syllabi (Pre and Post)	396
19.2.2 Highlights	396
19.2.3 Challenges	397
19.3 New Plugged Activities	398
19.3.1 Greenfoot	398
19.3.2 Multithreaded Java Computing Through Parallel Image Processing	399
19.4 Course-wide Pre and Post Course Surveys	400
19.5 Other Activities and Ideas	401
19.6 Conclusion	401
Bibliography	402
Appendix	403
PART III: Sample Chapter CDER Vol 3 - Mahajan	404
20 A Sample Chapter from CDER Book Vol 3 - Integrating Parallel Programming Concepts Using OpenMP	405
20.1 Introduction	407
20.1.1 Motivation to Integrate Parallel Programming in Undergraduate Education	407
20.1.2 Chapter Overview	408
20.2 Course Context and Implementation	408
20.2.1 Overview of Data Structures and Algorithms CSC322 Course	408
20.2.2 Rationale for Introducing PDC and OpenMP	409
20.2.3 Key Challenges in Curriculum Redesign	410
20.2.4 Curriculum After Integration of OpenMP Along side Traditional Concepts	411
20.3 Why OpenMP in Teaching Parallelism?	412
20.3.1 Overview of OpenMP: Basics for Beginners	412
20.3.2 Core Concepts and Constructs Covered in the New Syllabus	413
20.4 Teaching Methodologies and Strategies	418
20.5 Challenges and Lessons Learned	419
Bibliography	425
Appendix	426
20.A Appendix	426
Index of Terms	427

List of Figures

1	Suggested reading paths by CS1 adoption goal.	29
2	Organization of Chapter 1 – common CS1 activities and adoption-guidance.	30
3	Common structure of institutional exemplar chapters.	31
1.1	Organization of Chapter 1 – common CS1 activities and adoption-guidance.	39
1.2	Flag of Mauritius [7]	43
1.3	Graphical depiction of the Flag Maker scenarios: Scenario 1 (top left), Scenario 2 (top right), Scenario 3 (bottom left), and Scenario 4 (bottom right). P1–P4 depict the regions to be colored by each “processor”. The cells after Scenario 1 are numbered to show the order in which they should be colored.	44
1.4	Modified ASPECT survey used for the Penny Sorting unplugged activity . .	51
1.5	Parallel Search Animation	52
1.6	Parallel Linked List Animation	53
1.7	Flag Coloring Animation	54
1.8	Zombie Attack Animation	55
1.9	Responses from participants	57
1.10	The students were then asked if they felt prepared to apply parallel computing concepts to new problems beyond this activity. 18.2 % strongly agreed with it. 54.5% agreed and 27.3 % were neutral.	58
1.11	Example C program displayed as verbatim text.	58
1.12	The Lithuanian flag, as drawn by the Flagmaker assignment.	59
1.13	The assignment piece for the Japanese flag.	65
1.14	Solution as text for the Lithuanian flag.	65
2.1	TNTECH CS1 Prior Programming Experience	74
2.2	TNTECH Organization of Pennies	79
2.3	TNTECH CS1 Penny Activity Phase 1	80
2.4	TNTECH CS1 Penny Activity Phase 2	80
2.5	TNTECH CS1 Penny Activity Phase 3	81
2.6	TNTECH CS1 Penny Activity Phase 4	81
2.7	TNTECH CS1 Box of 5,000 Pennies	82
2.8	TNTECH CS1 Level of Agreement Unplugged Penny Search Activity	83
2.9	TNTECH CS1 Prizes Used for Flag Maker Activity	84
2.10	TNTECH CS1 Screenshot of Earthquake Tracker Assignment	86
2.11	TNTECH CS1 Time to Complete Earthquake Assignment (All Semesters) .	87
2.12	TNTECH CS1 Estimated Time to Complete Earthquake Tracker Assignment	88

2.13	TNTECH CS1 Level of Agreement Earthquake Tracker Assignment	89
2.14	TNTECH CS1 Screenshot of Plugged-In OpenMP Data Parallelism Assignment	90
2.15	TNTECH CS1 Hours Spent on Plugged-In OpenMP Lab Assignment	94
2.16	TNTECH CS1 What Students Learned from Plugged-In OpenMP Data Parallelism Assignment	95
2.17	TNTECH CS1 Level of Agreement OpenMP Data Parallelism Lab Assignment	95
4.1	USI CS1 Pre vs Post Percentage of Correct Questions for N=24	128
4.2	USI CS1 Response Distribution by Item	129
4.3	USI CS1 Thematic Analysis of Open Response Survey Questions	130
4.4	USI CS1 Diverging Likert Distribution of Engagement Items (N = 33)	133
4.5	USI CS1 Example Flag Represented as a Colored Grid and Corresponding Code	134
4.6	USI CS1 Fall 2024 Pre to Post Shift on Every Survey Item	143
4.7	USI CS1 Fall 2025 Pre to Post Shift on Every Survey Item	146
4.8	USI CS1 Improvement of Each Item from Benchmark Fall 2024 to PDC Intervention Fall 2025	149
4.9	USI CS1 Pre to Post Gains on Four PDC Measures: Parallel Processing, Distributed Computing, and PDC Understanding	150
4.10	USI CS1 Progressive Operational Activity Phases to Benchmark Execution Time	150
5.1	A screenshot of Module 1.0's Parallel Computing Demo	163
5.2	Example run of parallel password cracking. The contents of a dictionary are split among a specified number of threads ("down" to "mallorca" for example).	164
5.3	A screenshot of Module 3.0's Producer-Consumer Demo	164
6.1	Flag coloring animation	178
6.2	Zombie Attack homework: Red grid represents Zombie and Blue grid represents unaffected human	179
6.3	Pre/post comparison of student self-reported experience with PDC-related concepts. Mean ratings are reported on a seven-point scale.	187
6.4	Pre/post comparison of student self-reported programming experience across core C++ topics.	188
6.5	Pre/post comparison of student attitudes, interest, and self-reported understanding.	188
7.1	Custom zyBooks Section 1.9	199
7.2	Custom zyBooks Section 1.9 continued	200
7.3	CASPER CS1 Part 1 of Plugged-In OpenMP Array Creation Assignment . .	204
7.4	CASPER CS1 Part 2 of Plugged-In OpenMP Array Creation Assignment . .	205
7.5	CASPER CS1 Part 2 of Plugged-In OpenMP Array Creation Assignment . .	206
7.6	CASPER CS1 Part 3 of Plugged-In OpenMP Array Creation Assignment . .	206
7.7	CASPER CS1 Part 1 of Plugged-In OpenMP Array Sum Assignment	207
7.8	CASPER CS1 Part 3 of Plugged-In OpenMP Array Sum Assignment	208
7.9	CASPER CS1 Hardware Circuit for Physical Computing Project 1	211

7.10	CASPER CS1 Physical Computing project 2 given code for instruction on the python multiprocessing package	213
7.11	CASPER CS1 Sample Survey Question Reflecting on Level of Experience . .	217
7.12	CASPER CS1 Sample Survey Question Reflecting on Level of Interest in Computing and PDC	218
8.1	Flag Maker Aspect Categories	235
8.2	Penny Sorting Aspect Categories	241
11.1	TNTECH CS2 Program 2	300
11.2	TNTECH CS2 Program 2 Part 1	301
11.3	TNTECH CS2 Program 2 Part 2	302
17.1	Description of the image content.	365
17.2	Description of the image content.	365
17.3	Part 1 of Intro to OpenMP assignment	367
17.4	Part 2 of Intro to OpenMP assignment	367
17.5	Part 2 of Intro to OpenMP assignment	368
17.6	Part 3 of Intro to OpenMP assignment	368
17.7	Part 3 of Intro to OpenMP assignment	369
17.8	Part 3 of Intro to OpenMP assignment	370
17.9	Part 3 of Intro to OpenMP assignment	371
17.10	Part 3 of Intro to OpenMP assignment	371
17.11	Part 3 of Intro to OpenMP assignment	371
17.12	Part 3 of Intro to OpenMP assignment	373
17.13	Part 3 of Intro to OpenMP assignment	373
17.14	Student responses to the question "In general, my interest in computing is high". Blue dots are student responses from Spring 2025 in which there was no PDC intervention. Orange dots are student responses from Spring 2026 in which there were several PDC interventions.	375
17.15	Student responses to the question "My interest in parallel and distributed computing is high". Blue dots are student responses from Spring 2025 in which there was no PDC intervention. Orange dots are student responses from Spring 2026 in which there were several PDC interventions.	376
17.16	Student responses to the question "Please rate your experience with using Queues in your programs". Blue dots are student responses from Fall 2024 in which there was no PDC intervention. Orange dots are student responses from Fall 2025 in which there were several PDC interventions.	376
17.17	Student responses to the question "Please rate your experience with using classes & objects in your programs". Blue dots are student responses from Fall 2024 in which there was no PDC intervention. Orange dots are student responses from Fall 2025 in which there were several PDC interventions. . . .	377

17.18	Student responses to the question "Please rate your experience with Big O and algorithmic complexity". Blue dots are student responses from Fall 2024 in which there was no PDC intervention. Orange dots are student responses from Fall 2025 in which there were several PDC interventions.	377
17.19	Student responses to the question "Please rate your experience using Trees in your programs". Blue dots are student responses from Fall 2024 in which there was no PDC intervention. Orange dots are student responses from Fall 2025 in which there were several PDC interventions.	378
17.20	Student responses to the question "Please rate your experience using BTrees in your programs". Blue dots are student responses from Fall 2024 in which there was no PDC intervention. Orange dots are student responses from Fall 2025 in which there were several PDC interventions.	378
17.21	Student responses to the question "Please rate your experience using Lists/Linked Lists in your programs". Blue dots are student responses from Fall 2024 in which there was no PDC intervention. Orange dots are student responses from Fall 2025 in which there were several PDC interventions.	379
17.22	Student responses to the question "Please rate your experience using in your programs". Blue dots are student responses from Fall 2024 in which there was no PDC intervention. Orange dots are student responses from Fall 2025 in which there were several PDC interventions.	379
18.1	Description of the image content.	384
19.1	A Student Sample of a Greenfoot Game Design	399
20.1	Lecture slides introducing the task parallelization concept by analogies from real-life act of performing different tasks in kitchen together	414
20.2	Lecture slides illustrating Data Parallelism: Multiple sandwiches prepared in parallel, each following the same sequence of steps.	421
20.3	Demonstration of a parallel code of "Hello world" using OpenMP	422
20.4	Setting -fopenmp flag on OnlineGDB to compile and run programs with openMP constructs for parallelization	422
20.5	Code sharing option in OnlineGDB which allows users to fork and execute the code from this link	423

1	Quick comparison of CS1 institutional exemplars for potential adopters. . . .	29
2.1	TNTECH CS1 Learning Outcomes & Blooms Levels	70
2.2	TNTECH CS1 Student Majors by Semester	71
2.3	TNTECH CS1 Student Gender Identity	72
2.4	TNTECH CS1 Race/Ethnicity of Students (Select All that Apply)	72
2.5	TNTECH Classification of CS1 Students	73
2.6	TNTECH CS1 Student Experience with General Computing	73
2.7	TNTECH Student Programming Experience Entering CS1	73
2.8	TNTECH CS1 Spring 2026 Course Syllabus Calender with Highlighted PDC Content	75
2.9	TNTECH Sample Size for Pre-Course and Post-Course Surveys	96
2.10	TNTECH CS1 Baseline Results: Spring 2024	98
2.11	TNTECH CS1 Intervention Results: Fall 2024, Spring 2025, Fall 2025, and Spring 2026 Combined	100
4.1	USI CS1 Relevant PDC Topics and Blooms Levels	117
4.2	USI CS1 Gender Distribution	119
4.3	USI CS1 Race/Ethnicity Distribution	119
4.4	USI CS1 Class Standing	119
4.5	USI CS1 Declared Majors	120
4.6	USI CS1 Self-Reported General Computing Experience	120
4.7	USI CS1 Self-reported prior programming experience of CS1 participants . .	120
4.8	USI CS1 Fall 2025 Course Syllabus Calender with Highlighted PDC Content	122
4.9	USI CS1 Approximate Timing of Flag Maker Activity	127
4.10	USI CS1 Approximate Timing of Unplugged Penny Sorting Exercise	131
4.11	USI CS1 Approximate Timing of the Flag Maker Plugged-In Activity	135
4.12	USI CS1 Approximate Timing of the Penny Sort Plugged-In Activity	138
4.13	USI CS1 Approximate Timing of the Greenfoot Plugged-In Demo	141
4.14	USI CS1 Pre/Post Survey Results from Benchmark Fall 2024	142
4.15	USI CS1 Pre/Post Survey Results from PDC Intervention Fall 2025	145
4.16	USI CS1 Combined Pre/Post Survey Results from Fall 2024 and Fall 2025 .	148
5.1	Week-to-Week Modules for UNL's CS1	160
5.2	Time Commitment for CS1 Activities - UNL	161

5.3	Survey Results for CS1 - UNL. Sample size was 125 and included data from fall 2024 and fall 2025 semesters. The pre- and post means are reported along with the difference (Diff). Statistical significance is measured using a non-parametric Wilcoxon signed-rank (paired) test. The Wilcoxon statistic (W) is reported along with the p -value. Significance is indicated as Yes using $p < 0.05$. Effect size is reported using Cliff's Delta (δ). A negative value indicates an increase in the post-survey data. The interpretation of the effect size is reported (negligible, small, medium, large) as suggested by [5].	168
6.1	PDC topics and their corresponding levels in the revised Bloom's Taxonomy.	173
6.2	Sequential and parallel versions of summing values in an array.	175
6.3	Summary of PDC activities integrated into the CS1 course.	181
6.4	High-level syllabus with PDC enhancements in CS1.	184
6.5	Pre/post changes in PDC-related experience. Percent favorable is the percentage of responses coded 5 or higher.	186
6.6	Pre/post changes in programming experience across core C++ concepts. . .	189
6.7	Pre/post changes in interest, perceived importance, and self-reported understanding.	189
6.8	Post-survey ratings of course learning activities.	189
6.9	Post-survey ratings of course learning outcomes.	190
7.1	CASPER CS1 Relevant PDC Topics and Bloom's Levels	193
7.2	CASPER CS1 Baseline versus Summer 2025 PDC Intervention	196
7.3	CASPER CS1 Baseline versus Spring 2026 PDC Intervention	196
7.4	CASPER CS1 Survey Results for Experience Questions	216
7.5	CASPER CS1 Survey Results Experience with PDC Topics	218
7.6	Survey Results for CS1 Interest Questions- Casper College	218
7.7	CASPER CS1 Survey Results Interest Questions	219
7.8	CASPER CS1 Survey Results for Understanding Questions	219
8.1	Bloom's Taxonomy Levels Addressed by Each PDC Activity	224
8.2	Syllabus Pre- and Post-PDC Topics Added	228
8.3	Estimated Instructional Time for Unplugged Flag Maker Activity	232
8.4	Pre-test and Post-test Performance by Question	234
8.5	Student Engagement Survey Results Grouped by ASPECT Categories	236
8.6	Estimated Instructional Time for Unplugged Penny Sorting	238
8.7	Student Engagement Survey Results Grouped by Adapted ASPECT Categories for the Penny Sorting Activity	242
8.8	Estimated Instructional Time for Plugged-in Penny Sorting	243
8.9	Comparison of Pre- and Post-Course Survey Results (Fall 2024)	248
8.10	Comparison of Pre- and Post-Course Survey Results (Fall 2025)	249
8.11	Comparison of Pre- and Post-Course Survey Results (Spring 2026)	250
8.12	Estimated Instructional Time for Unplugged MP Writing Activity	252
9.1	Relevant PDC topics and Bloom's levels	262
9.2	MSU CS1 Gender Distribution	263

9.3	MSU CS1 Race/ethnicity Distribution	263
9.4	MSU CS1 Current Class Standing Distribution	263
9.5	Summary comparison of CS1 before and after PDC integration.	265
9.6	Post-integration CS1 course schedule with PDC integration highlighted.	266
9.7	Summary of Flag Maker post-activity survey responses.	269
9.8	Themes from open-ended Flag Maker activity responses.	270
9.9	CS1 survey results for basic programming skills.	272
9.10	CS1 survey results for PDC concepts.	272
9.11	CS1 survey results for attitudes and beliefs.	272
9.12	Matched pre- and post-course survey results for basic computing concepts in CS1.	273
9.13	Matched pre- and post-course survey results for PDC concepts in CS1.	273
9.14	Matched pre- and post-course survey results for attitudes and perceptions in CS1.	274
10.1	Instructor Resources.	287
10.2	Setup Checklist.	289
10.3	Timing Plan for a Two-Session Implementation.	290
11.1	TNTECH CS2 Learning Outcomes & Blooms Levels	296
11.2	TNTECH CS2 Majors	297
11.3	TNTECH CS2 Student Gender Identity	297
11.4	TNTECH CS2 Race/Ethnicity of Students	298
11.5	TNTECH Classification of CS2 Students	298
11.6	TNTECH CS2 Program 2 Feedback from Students	301
11.7	TNTECH CS2 Sample Size for Pre-Course and Post-Course Surveys	303
11.8	TNTECH CS2 Student Comfort With Core Topics	306
11.9	TNTECH CS2 Student Comfort With PDC Topics	307
14.1	Survey Results for CS1 - UNL. Sample size was $n = 33$ and included data from spring 2025. The pre- and post means are reported along with the difference (Diff). Statistical significance is measured using a non-parametric Wilcoxon signed-rank (paired) test. The Wilcoxon statistic (W) is reported along with the p -value. Significance is indicated as Yes using $p < 0.05$. Effect size is reported using Cliff's Delta (δ). A negative value indicates an increase in the post-survey data. The interpretation of the effect size is reported (negligible, small, medium, large) as suggested by [1].	329
15.1	Comparison between serial and OpenMP parallel merge sort implementations.	342
15.2	Potential speedup for search algorithms.	342
16.1	Comparison of course organization before and after PDC integration.	349
16.2	Comparison between parallel programming and vectorization.	350
18.1	Potential speedup for search algorithms.	384
19.1	MSU CS2 Gender Distribution	393

19.2 MSU CS2 Race/ethnicity Distribution	393
19.3 MSU CS2 Current Class Standing Distribution	393
19.4 Summary comparison of CS2 before and after PDC integration.	396
19.5 Post-integration CS2 course schedule with adopted PDC modules highlighted.	397
19.6 Pre/post gains in self-reported PDC-related knowledge.	400
19.7 Pre/post results for attitudes and beliefs about computing and PDC.	400
20.1 Illustration of Amdahl's Law for potential speedup for linear and binary search using 4 threads	418
